 LinkedIn: nishanth-kr

PROFESSIONAL SUMMARY

Full Stack Developer and AI/ML Engineer with expertise in building scalable applications using Python, FastAPI, and modern web frameworks. Technical Intern in AI at UNLOX with hands-on experience in RAG pipelines, prompt engineering, and vector databases. Completed UNILOX Academy™ Job Bridge Program with dual certifications in Artificial Intelligence. Trained in 8+ Infosys certifications covering AI, deep learning, generative models, and robotic process automation. Strong background in system design, backend development, and cloud-native architecture.

PROFESSIONAL EXPERIENCE

Technical Intern - AI

UNLOX | Current

- Developing AI solutions using LLMs, RAG pipelines, and vector databases
- Building end-to-end AI applications with Python and FastAPI
- Implementing prompt engineering strategies and model optimization

Campus Ambassador

UNLOX | Internship

- Led technical initiatives and community engagement at campus level
- Collaborated on projects spanning AI, ML, and full stack development

Freelance Developer

Multiple Projects | Ongoing

- Developed full stack web applications with React, Node.js, and Python
- Delivered AI-powered solutions and ML models for various clients

TECHNICAL SKILLS

AI/ML & LLM Engineering

Large Language Models • Prompt Engineering • Retrieval-Augmented Generation (RAG) • LangChain • Vector Databases • Gemini API • OpenAI GPT-3 • Generative Models • LLM Fine-tuning • Computer Vision • Deep Learning • TensorFlow • PyTorch

Backend & Languages

Python • FastAPI • Django • Flask • Node.js • Express.js • Java • REST APIs • Microservices • System Architecture • RPA (Robotic Process Automation)

Frontend & UI

React • JavaScript • TypeScript • HTML5 • CSS3 • Tailwind CSS • Bootstrap • Responsive Design

Databases & Data

PostgreSQL • MongoDB • Redis • MySQL • SQLite • Neon PostgreSQL • Prisma ORM • Data Modeling

Cloud & DevOps

AWS • Docker • Kubernetes • Linux • Nginx • CI/CD Pipelines • GitHub Actions • Vercel • Netlify • Render • Firebase • Agile/Scrum

FEATURED PROJECTS

AI Gym Fitness Assistant

- Full-stack AI application integrating Google Gemini LLM for personalized workout recommendations
- Frontend: React/JavaScript/HTML/CSS deployed on Vercel with responsive design
- Backend: FastAPI (Python) on Render with MediaPipe pose detection for form analysis
- Database: MongoDB for workout history and user preferences
- DevOps: CI/CD via GitHub Actions, automated testing and deployment

RAG Chatbot with Vector Databases

- Implemented Retrieval-Augmented Generation pipeline using Google Gemini and LangChain
- Integrated FAISS vector database for efficient semantic search and document retrieval
- Designed system for context-aware responses with custom prompt engineering

Machine Learning Projects

- Random Forest Model: Built classification model on Titanic dataset with performance metrics
- Gradient Boosting: Customer churn prediction with feature analysis and PDF reporting
- Computer Vision: Image classification and object detection projects

CERTIFICATIONS & ACHIEVEMENTS

UNLOX Academy™ Certifications

- Unlox Edge Certification: Artificial Intelligence (Job Bridge Program) - UNXAI-2026-4263
- Unlox Edge Certification: Artificial Intelligence (Internship & Project-based Learning) - UNXAI-INT-4263

Infosys SpringBoard Certifications (2026)

- Introduction to Artificial Intelligence (April 4, 2026)
- Introduction to Deep Learning (April 4, 2026)
- Computer Vision 101 (April 4, 2026)
- Introduction to Robotic Process Automation (April 5, 2026)
- OpenAI Generative Pre-trained Transformer 3 (GPT-3) for Developers (April 5, 2026)
- Generative Models for Developers (April 5, 2026)
- Deep Learning for Developers (April 6, 2026)
- Agile Scrum in Practice (April 6, 2026)

EDUCATION

Sri Shakthi Institute of Engineering and Technology

2025 - 2029

Pursuing undergraduate degree in Computer Science and Engineering with focus on AI/ML specialization

UNILOX Academy™

AI/ML Course + Full Stack Web Development Track (MERN)

Completed comprehensive curriculum in machine learning, deep learning, backend engineering, and cloud architecture with Job Bridge certification

KEY COMPETENCIES

- AI/LLM Engineering: RAG, prompt engineering, vector DBs, model integration, generative AI
- Deep Learning: CNN, RNN, transformers, computer vision, NLP
- Full Stack Development: End-to-end application design and implementation
- Backend Architecture: Scalable systems, microservices, API design, RPA
- Cloud & DevOps: Docker, Kubernetes, CI/CD, cloud deployment, Agile methodologies
- Problem Solving: Data structures, algorithms, system design
- Open Source: Active GitHub contributor with 18+ repositories
